Nature has a peculiar way of going about her business which in general is conducive to doubt and awakens pessimistic predictions from the men who that neither scientific nor popular protest weighs in the balance against her whims is as discomposing as it is alarming. Men look to her for assurances, and when they are not forthcoming they begin to doubt; and to doubt is to become a prophet of calamity. Last June there was a white frost in all the north country. It blighted vegetation even as it nourished a large crop of pessimists. Peaches were killed! Berry erop badly damaged! Small fruit ruined! Smash and bow-wows! And now In these mellowing days of autumn, after a protracted silence on all subjects pertaining to horticulture, the fruitgrower is talking again. He isn't quite done figuring his totals, but he has already found that he has more to be thankful for at harvest than in all the days of his life. The peach crop is the largest ever harvested, and it has brought him more money than ever behas yielded abundantly and has been plenty are everywhere. But all this is ocation, he will be as bad. He will torture the community and he will ers among whom he spreads the seed of

The number of members of the Grand Army in good standing the 30th of last June was 357,639, being a loss of 13,916 during the year. Of this loss only a little over a half was by death. The remainder was chiefly due to suspensions. Large as the membership of the organization is, the number of surviving old soldiers is much larger. There are about 700,000 on the pension rolls. There are many who have applied for pensions under the law of 1890, but have not got them yet, and there are many who have no pensions and have not asked for them. So it may be deemed strange, perhaps, that the Grand Army has not more members than it living in a city or village or in a thickly settled rural community naturally come together and form a post, there are many old soldiers who are isolated and not where they can get at one another. Numbers are scattered throughout the remote West and have no chance to organize. It must be remembered also that of those who served as officers during the war many belong to the Loyal Legion but not to the Grand

A Leather-Covered Piano. A decided novelty in the way of piano casing-the invention of a Milwaukee music dealer-is on exhibition in that city. After several years of study and experiment the inventor hit upon leather as the most attractive as well as the most durable article for ineasing planos. The instrument was built in Buffalo. The color of leather selected for the first specimen instrument was a rich black, handsomely embossed, giving the impression of exquisite carving. Not only does the instrument thus incased present a most attractive and dignified appearance, but it has the advantage of

being something in finish that cannot

be marred or spotted.

No set of men in the world more aptly illustrate a certain important point than prize fighters. The point is with regard to the punishment they give and have to take. Whether victors or vanquished, they come out of a contest bruised from head to foot. That such men should be seen with all the blue spots cured seems marvelous, until we know that they have use 1 St. Jacobs Oil. Every one knows the virtue of the great marketed to advantage. Peace and moral is, all can profit by the example. I the fighter knows he can be so easily cured it is a lesson to all subject to hurts; they will lose no time from work if they use it. Licorice grows chiefly on the banks of rivers Tigris and Euphrates.

In Olden Times People overlooked the importance of permanently beneficial effects and were satisfied with transient action, but now that it is generally know that Syrup of Figs will permanently cure habitual constipation, well informed people will not buy other laxatives, which act for a time, but finally injure the

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical frateraity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

THE STAPLE PRODUCT OF THREE CLUSTERS OF ISLETS.

So Many Sold That Hens' Eggs Are : Drug in San Francisco in Summer -Methods of Egg Hunters.

TOW many people know that for three months every summer hens' eggs in the markets of San Francisco have to take a back seat, giving precedence to the cheaper, larger, and handsomer eggs of the California murre, or guillemot, a sea bird related to the taste, brown flour in butter, put in auk, which breeds in countless thou- each. If you have green corn put a sands upon the Farallone Islands? A new and singular industry has been developed in the gathering of these eggs for the market by Italian and Greek fishermen, who peril their lives in frail fishing boats and in scaling the recky islets for the eggs of the Three clusters of rocky islands of

olcanic origin, thirty miles from San Francisco, in the Pacific Ocean, form the Farallones, South Farallone being the largest and the only one inhabited. Although of surpassing interest on account of their wild picturesqueness and the myriads of birds which there find a summer home, the Farallones are seldom, if ever, visited by the tourists. They are difficult of access. small fishing boats or an occasional outgoing tug being the only means of transit. South Farallone is about a mile i

ength and half a mile wide, everywhere cut up by jagged bridges, precipitous bluffs, pinnacles and rocky points, the highest, where the light house is situated, being 349 feet above the sea. The whole island may be said to be a veritable city of the birds, covering their eggs in dense colonies, swimming and diving or wheeling by housands through the air, with shrill, incessant cries. The bird census has never been taken.

Besides the murre, which lays the eggs, tufted puffins, Western gulls, three species of cormorant, casin's auklet, the asher petrel and the pigcon guillemot breed in large numbers.

The murre lays one large, pearshaped egg, having about twice the capacity of a hen's egg. This is curiously and beautifully marked in many | tle. The beef's paunch is carefully shades of red, brown and green, in surprising variation. The eggs sell readily at twenty cents a dozen in the a large needle and linen thread. Then narkets, and that they are considered valuable as a food supply is evidenced by the fact that 169,000 dozens are consumed annually.

In spite of this enormous product the birds seem to be almost as prolific as ever, although near the close of the season's collecting many "runt" eggs

are found. Two men who were left on Sugar Loaf, an isolated rock 185 feet high, collected 103,000 murre's eggs in one

the time is ready to begin work a curious but necessary performance takes place. The whole island is gone over and all the murre's eggs within reach are broken or thrown into the This is to insure fresh eggs, for has been set upon for a day is unfit for market. This is a time of rejoicing for the sea gulls, who love to feed upon the murre's eggs and are relentless pirates, robbing the poor murre at every opportunity of the one egg

she so zealously guards. Unlike the gull, the murre makes no nest whatever, covering its eggs on any bare rock that will support it. If left undisturbed the murres would lay but one egg each during the season, but as they are robbed they

continue laying. The collecting outfit of the egger is simple. A cotton flour sack is made into an "egg shirt" by cutting out a one on each side for arm holes; a gathering string about the mouth of the sack permits it to be drawn tightly about the waist, while a slit down the shirt in front makes an opening for stowing away the eggs. A little of the coarse Faralione weed, the only vegetation to be found on the island, is used for a shirt lining. It is astonishing how many of the large eggs can be carried in such a shirt, eighteen to to twenty dozen being considered a

fair load for each man. When an egg shirt is filled it is emptied into a basket to be taken to the landing. If overtaken by night the eggers dump the eggs into a pile, sometimes containing 1000 dozen, until the next day. Great care is taken to cover the baskets or heaps with old sacking or weeds, weighted with rocks, to prevent the rapacious gulls from getting at the eggs. These persistent an egg is espied through an opening they will tug at it until it is secured, the booty, followed by its screeching comrades, who soon attract a great flight of gulls, and often in incredibly short space of time they have taken

The Great Arch, a wonder of the slands forming a natural bridge where the surf churns in from the sea below, is fairly covered with murres, and even far down on the dizzy sides of the chasm they find a place for their eggs on the shelving rocks. Here, where it would seem to be suicide to dozens of eggs.

he murres have a hard life of it. They are clumsy birds on land, and when huddled in a cave can be frequently with cream. caught by the hand. The gulls not only carry off the eggs bodily to be eisure, but they will feed upon the young birds; for this reason the parent murres show constant anxiety for alone. As soon as they are old enough to take to the water they are safe, and the old birds may be seen at night | hours. Garnish with olives. in ghostly procession, leading and shoving the little murres over the crags to the sea. They have another dread enemy in the hawks from the their young.

islands, and the United States authorities have, on a number of occasions. forcibly removed them, only to have brown in hot oven. them return at the first opportunity. One year the eggers secreted themselves in the great Murre Cave, while the revenue autter Corwin hovered about the island for hours. The men

HOUSEHOLD AFFALAS.

MOCK TURTLE. One cup of cold meat cut in small pieces, pepper and salt to taste, one small onion, two quarts of water; boil two hours, then a quarter of an hour before serving boil three potatoes, cut in dice; one pinch of cloves, a little allspice, one hard-boiled egg chopped fine, sweet marjoram and parsley to little in. - New York World.

A STOVE ON A PLATFORM.

A housewife who has suffered from backache caused by leaning over the cook-stove, which usually stands several inches too low for comfort in working, has had her stove placed upon a small platform, a little larger than the stove, and about nine inches high, so that the cooking utensils on the stove will be within easy reach without stooping. Those who are planning houses would do well to indude such a platform in their ideal kitchen. The cost would be slight. -New York Post.

TO DRIVE AWAY ANTS. If you get some green peppermint, which usually grows by the brookside, and lay it on the floor and shelves of your pantry and kitchen you will find that the ants disappear immediately. Apply powdered sulphur very liberilly to the parts most frequented by them and they will turn their feet in ome other direction; or sprinkle sugar on a damp sponge, and when the feast is under way drop the sponge in

Put pieces of camphor gum or cloth wet with camphor on the pautry shelves and the ants will disappear. Use plenty of powdered borax in the pantry. - Philadelphia Times.

I will tell you how I saw it done more than fifty years ago in my father's house, writes an old housekeeper. My sister did the work and I helped a litemptied, turned inside out and laid in a tub, and the opening sewed up with air-slaked lime is thoroughly sprinkled all over it, special care being taken in sprinkling the honeycomb part. I am ot sure how long the tripe lay before it was tried with a broad-bladed table knife to see if the lime had loosened the inner lining of the tripe, but I know my sister watched it, and as soon as it scraped white and nice looking, it was scraped thoroughly, rinsed several times and set to soak over night in plenty of water with a handful of salt in it. I remember seeing my The eggers usually consist of twelve | sister add more lime sometimes-perto fifteen men, who inspect the great haps the lime had been slaked too long rookeries early in the season to see if -and 1 am sure she was careful to he birds have begun laying. ## Timely Warning.

The great success of the chocolate preparations of the house of Walter Baker & Co. (established in 1780) has led to the placing on the market many misleading and unscrupulous imitations of their name, labels, and wrappers. Walter Baker & Co. are the oldest and largest manufacturers of pure and high-grade Cocoas and Chocolates on this continent. No chemicals are used in their manufactures. Consumers should ask for, and be sure that

they get, the genuine Walter Baker & Co.'s goods. WALTER BAKER & CO., Limited, DORCHESTER, MASS.

### the food for all such.

How many pale folk there are! People who have the will, but no power to bring out their vitality; people who swing like a pendulum between strength and weaknessso that one day's work causes six days' sickness! People who have no life

for resisting disease—thin people, nerveless, delicate! The food for all such men, women, or children is Scott's EMULSION. The hypophosphites combined with the oil will tone up the system, give the blood new life, improve the appetite and help digestion. The sign of new life will be a fattening and reddening, which brings with it strength, comfort and good-nature.

Scott & Bowne, New York. All Druggists. 50c, and \$1.

Be sure you get Scott's Emulsion when you want it and not a cheaf substitute.
